Cloud Transformation
Without the Security Complexity

CATO
NETWORKS

A True Platform

Christian Andersson | Sales Engineer - Nordics

Remember when one was enough?

Who had one of these?

Then we upgraded

Who became the family IT support?

One remote. Problem solved?

One place to control everything

Behind the TV, the work remained

Who still owns the integration?

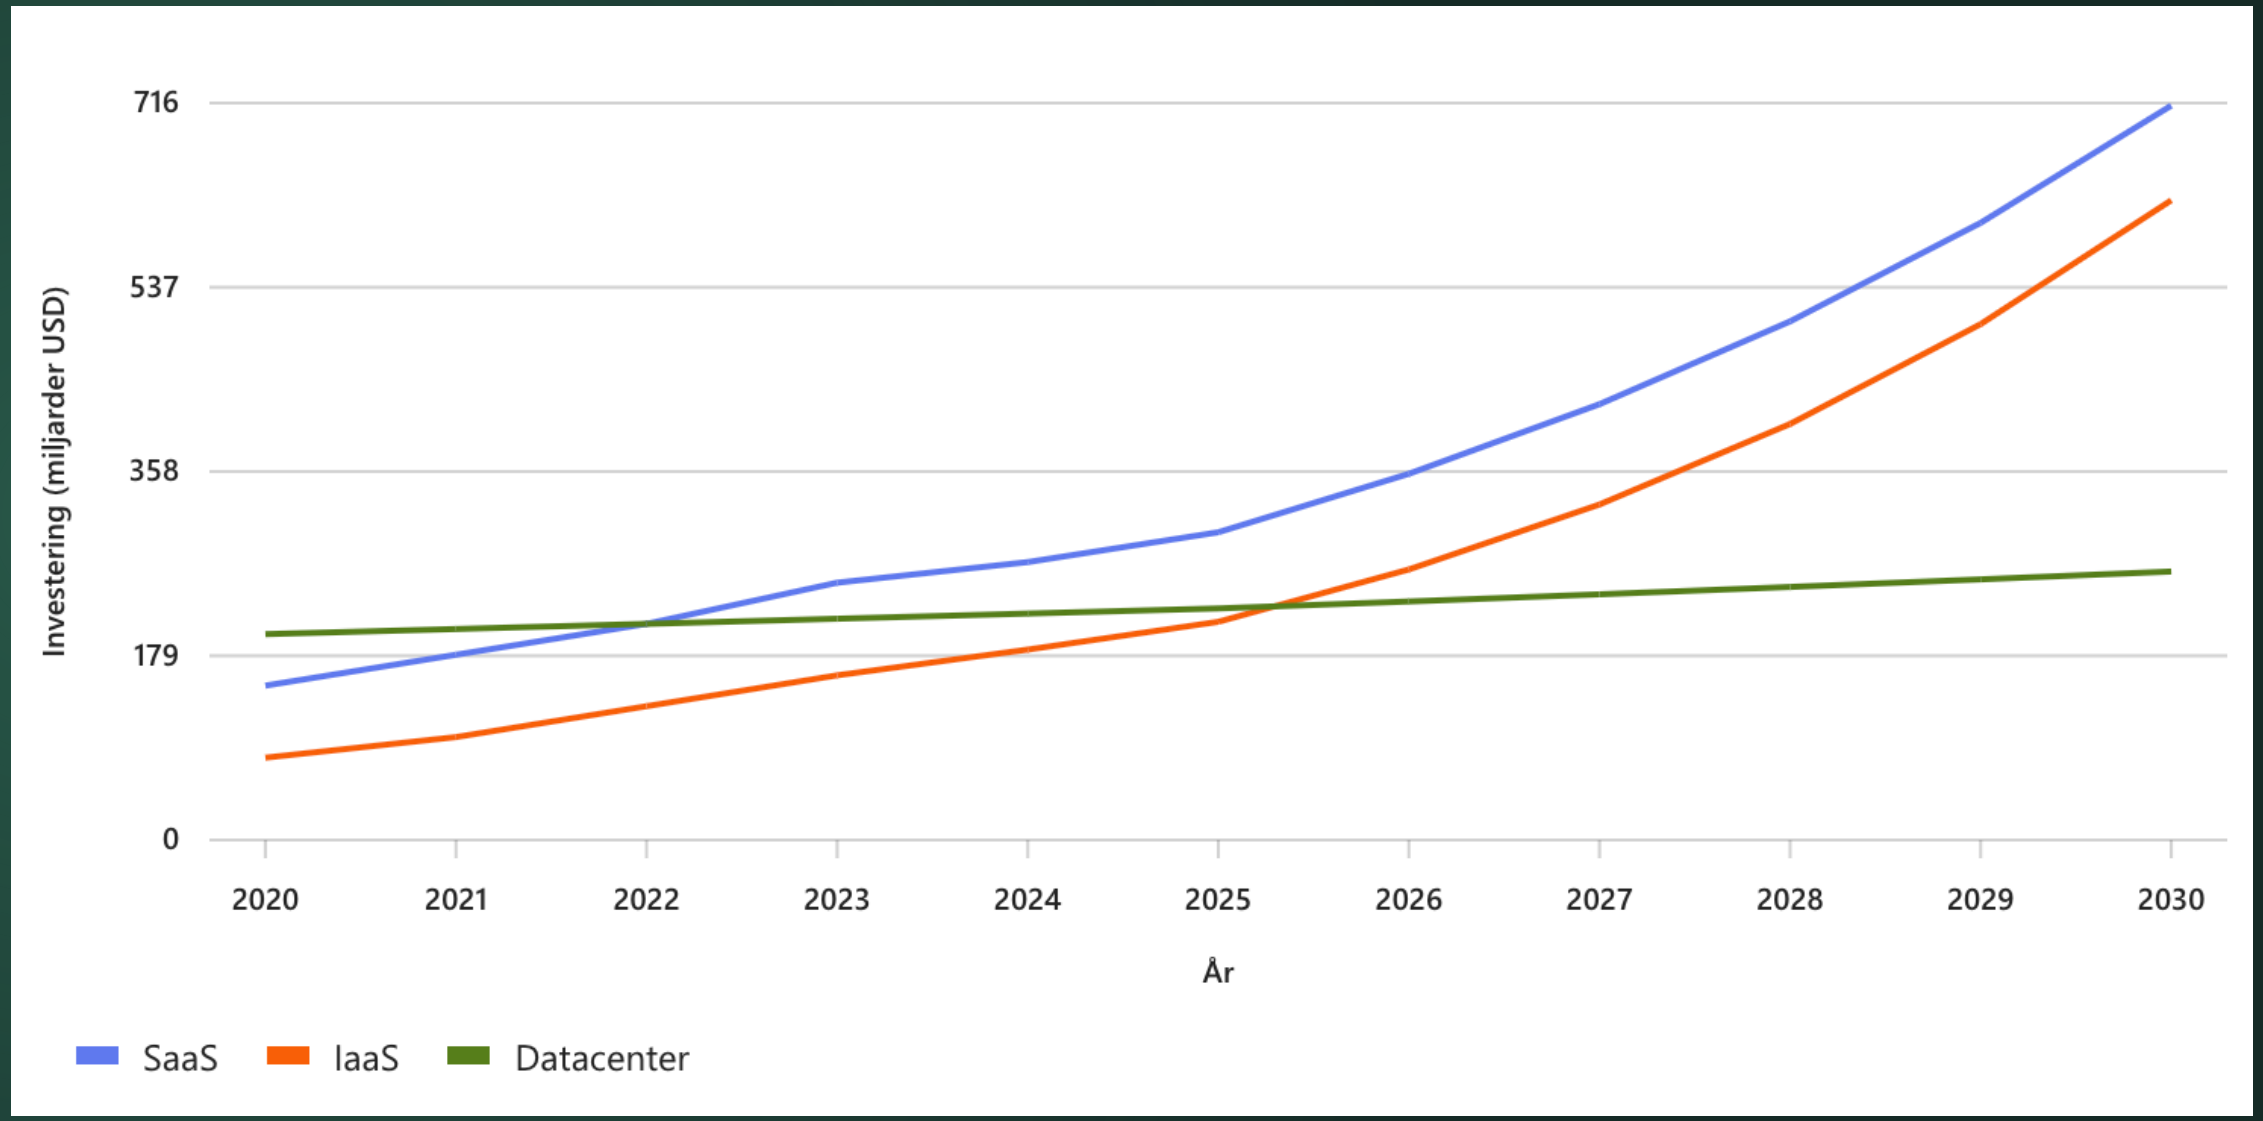

If your team still has to make all the pieces work together, how integrated is your platform?

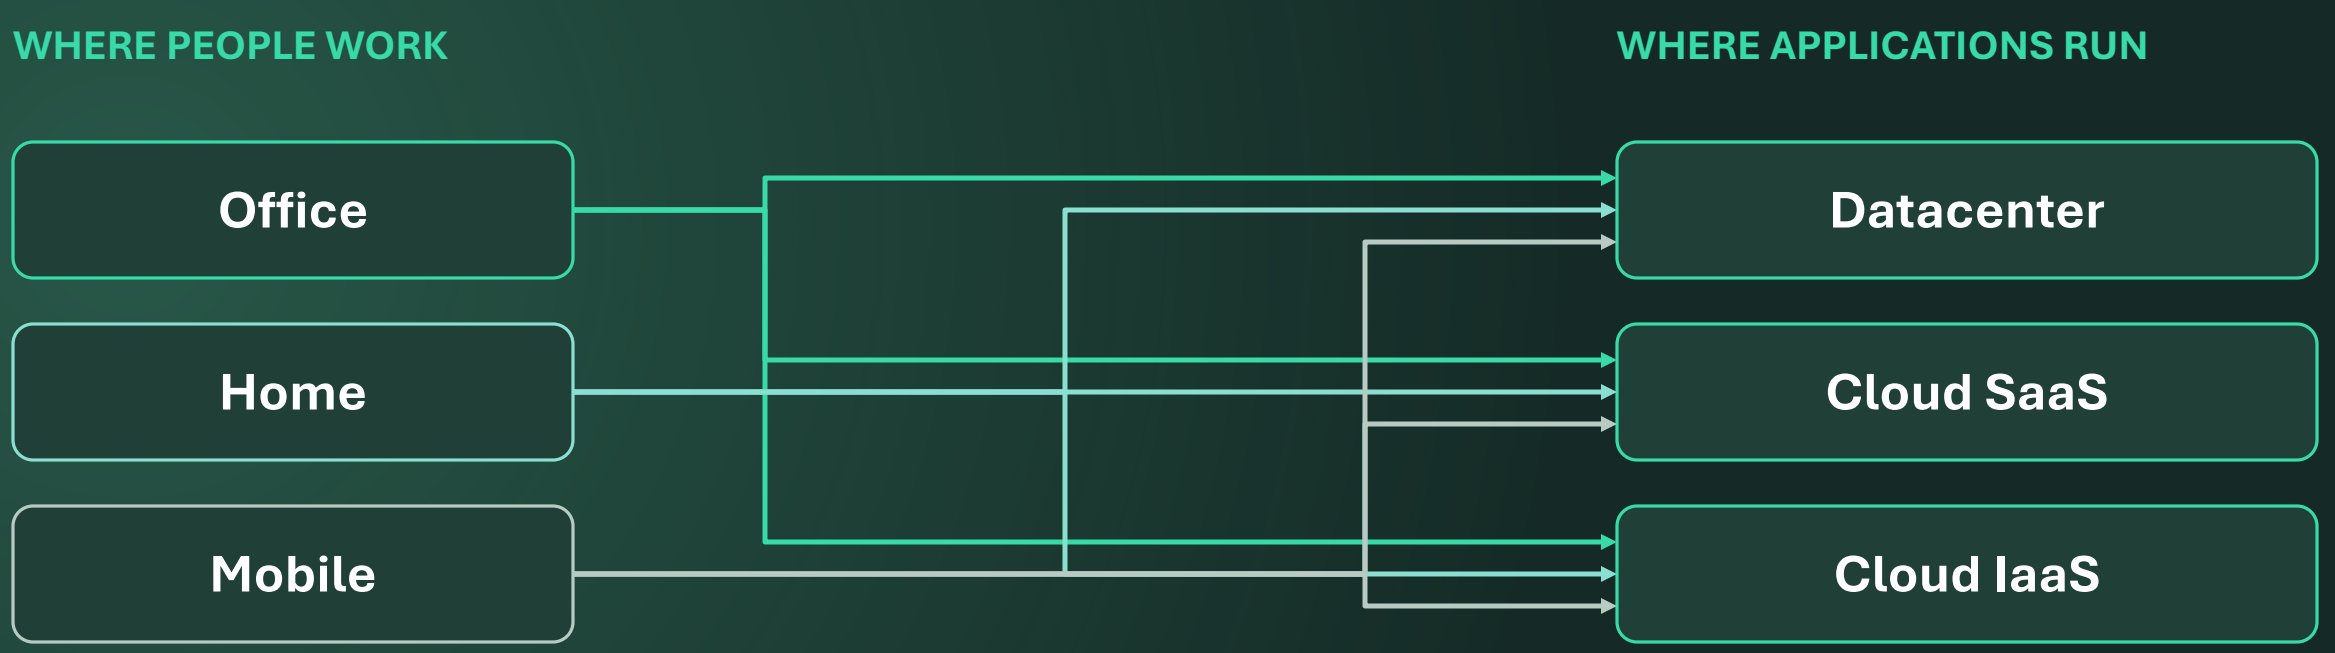

The Shift to Cloud:
Explosive Growth in SaaS & IaaS vs Flat Datacenter Spend

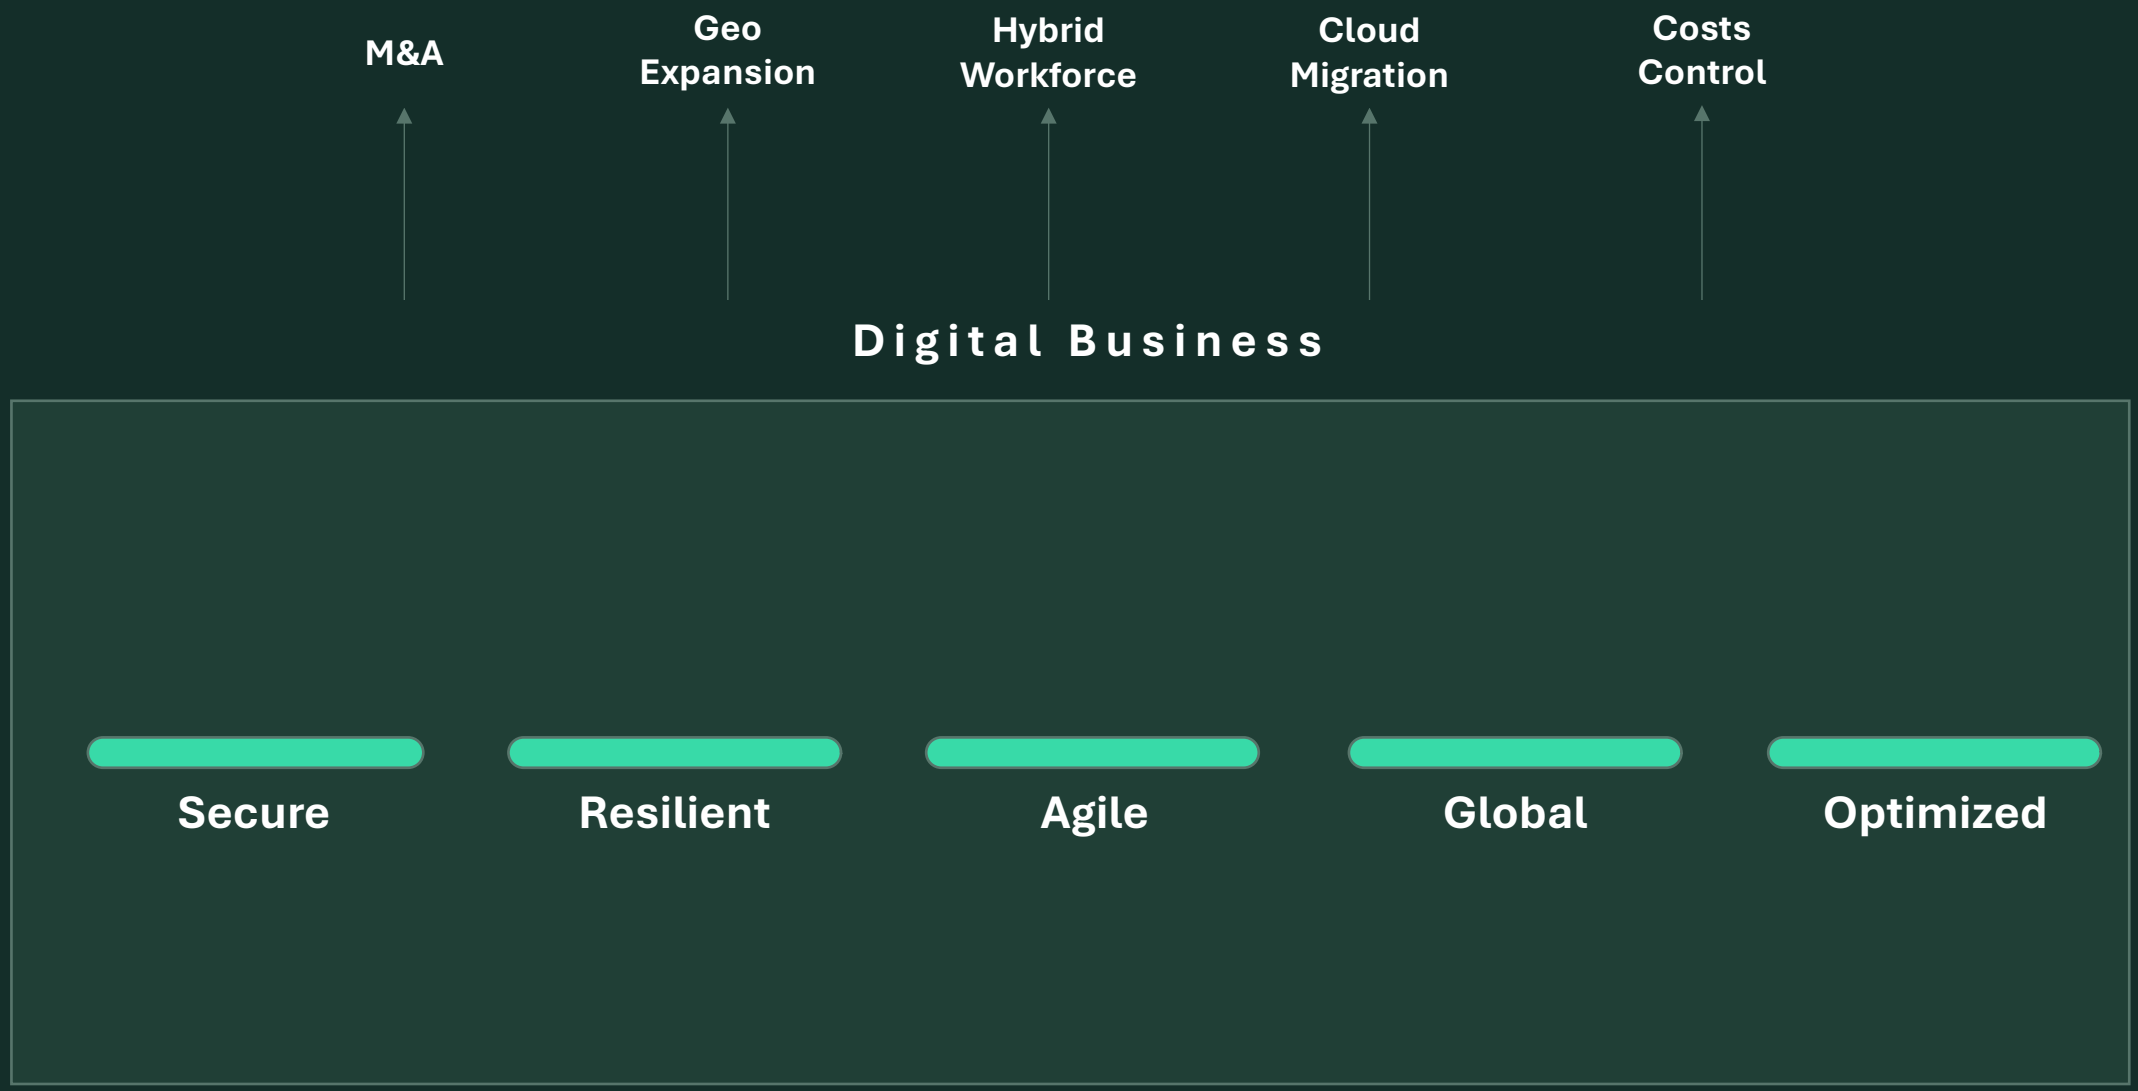

Cloud transformation changes the access paths

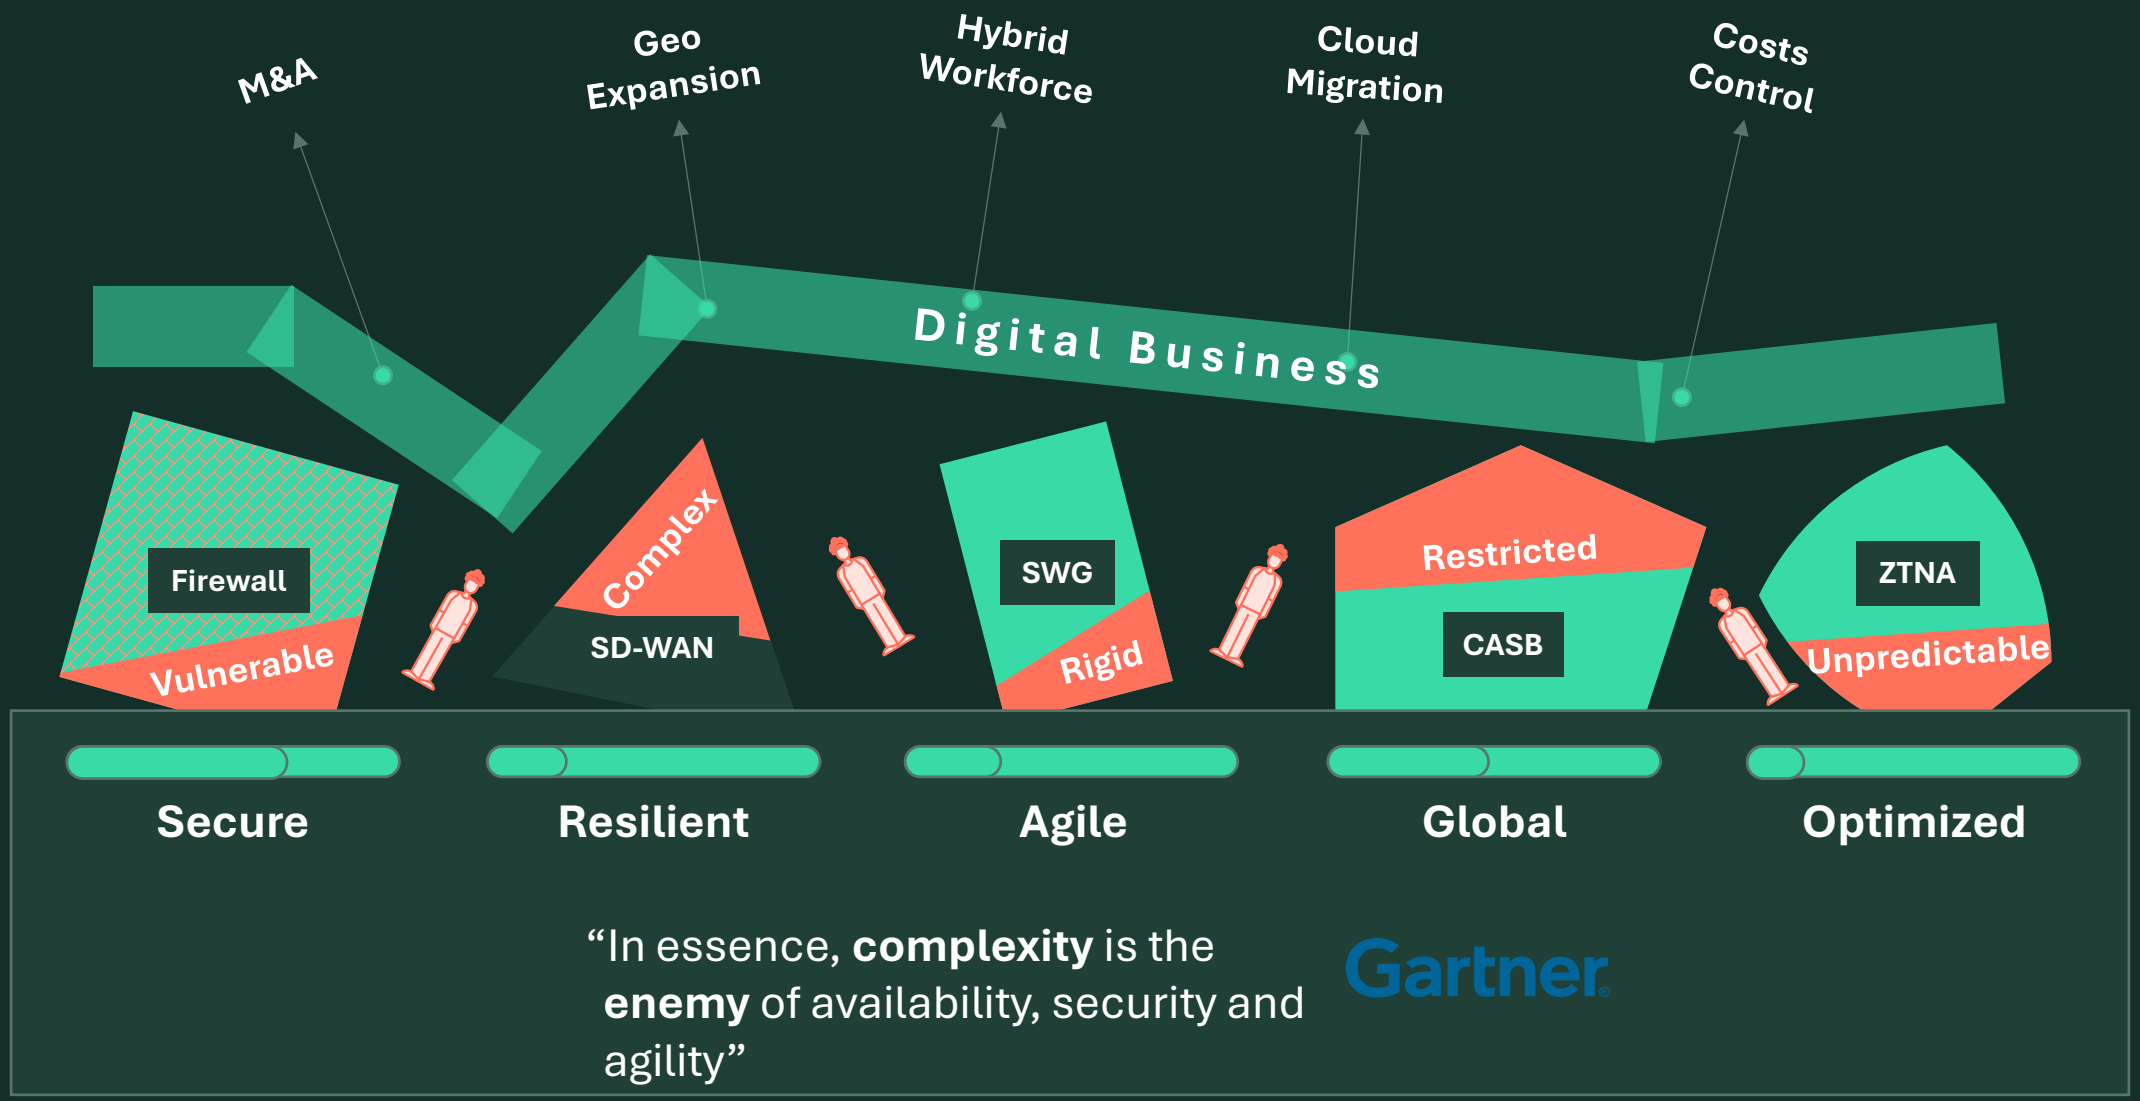

Every user group may need access to every application environment.

IT Must Drive the Digital Business

The WRONG IT "Platform" Slows Down the Business

"In essence, **complexity** is the **enemy** of availability, security and agility"

Gartner

*Avoid These 'Bottom 10' Networking Worst Practices", Gartner 2019

CATO NETWORKS

Does security follow the user?

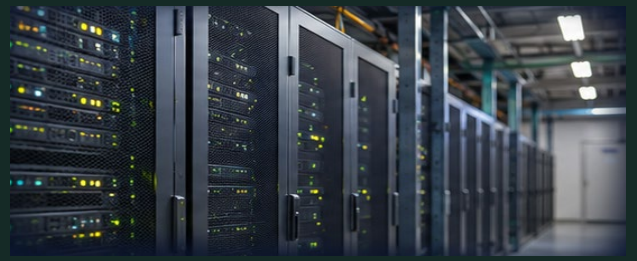

The same policy and visibility, wherever work happens?

User at home

Cloud service

Datacenter

AI

AI application

CATO NETWORKS

Who keeps security consistent?

Different paths.
The same protection?

User at home

?

Which policy applies?

?

Where is traffic inspected?

Cloud Service

Datacenter

AI

AI application

Can IT see the full picture?

CATO NETWORKS

AI adds another control surface

USE

Employees using AI

Discover usage, govern interactions and prevent data leakage.

BUILD

AI applications you build

Protect AI applications against prompt injection and enforce runtime policy.

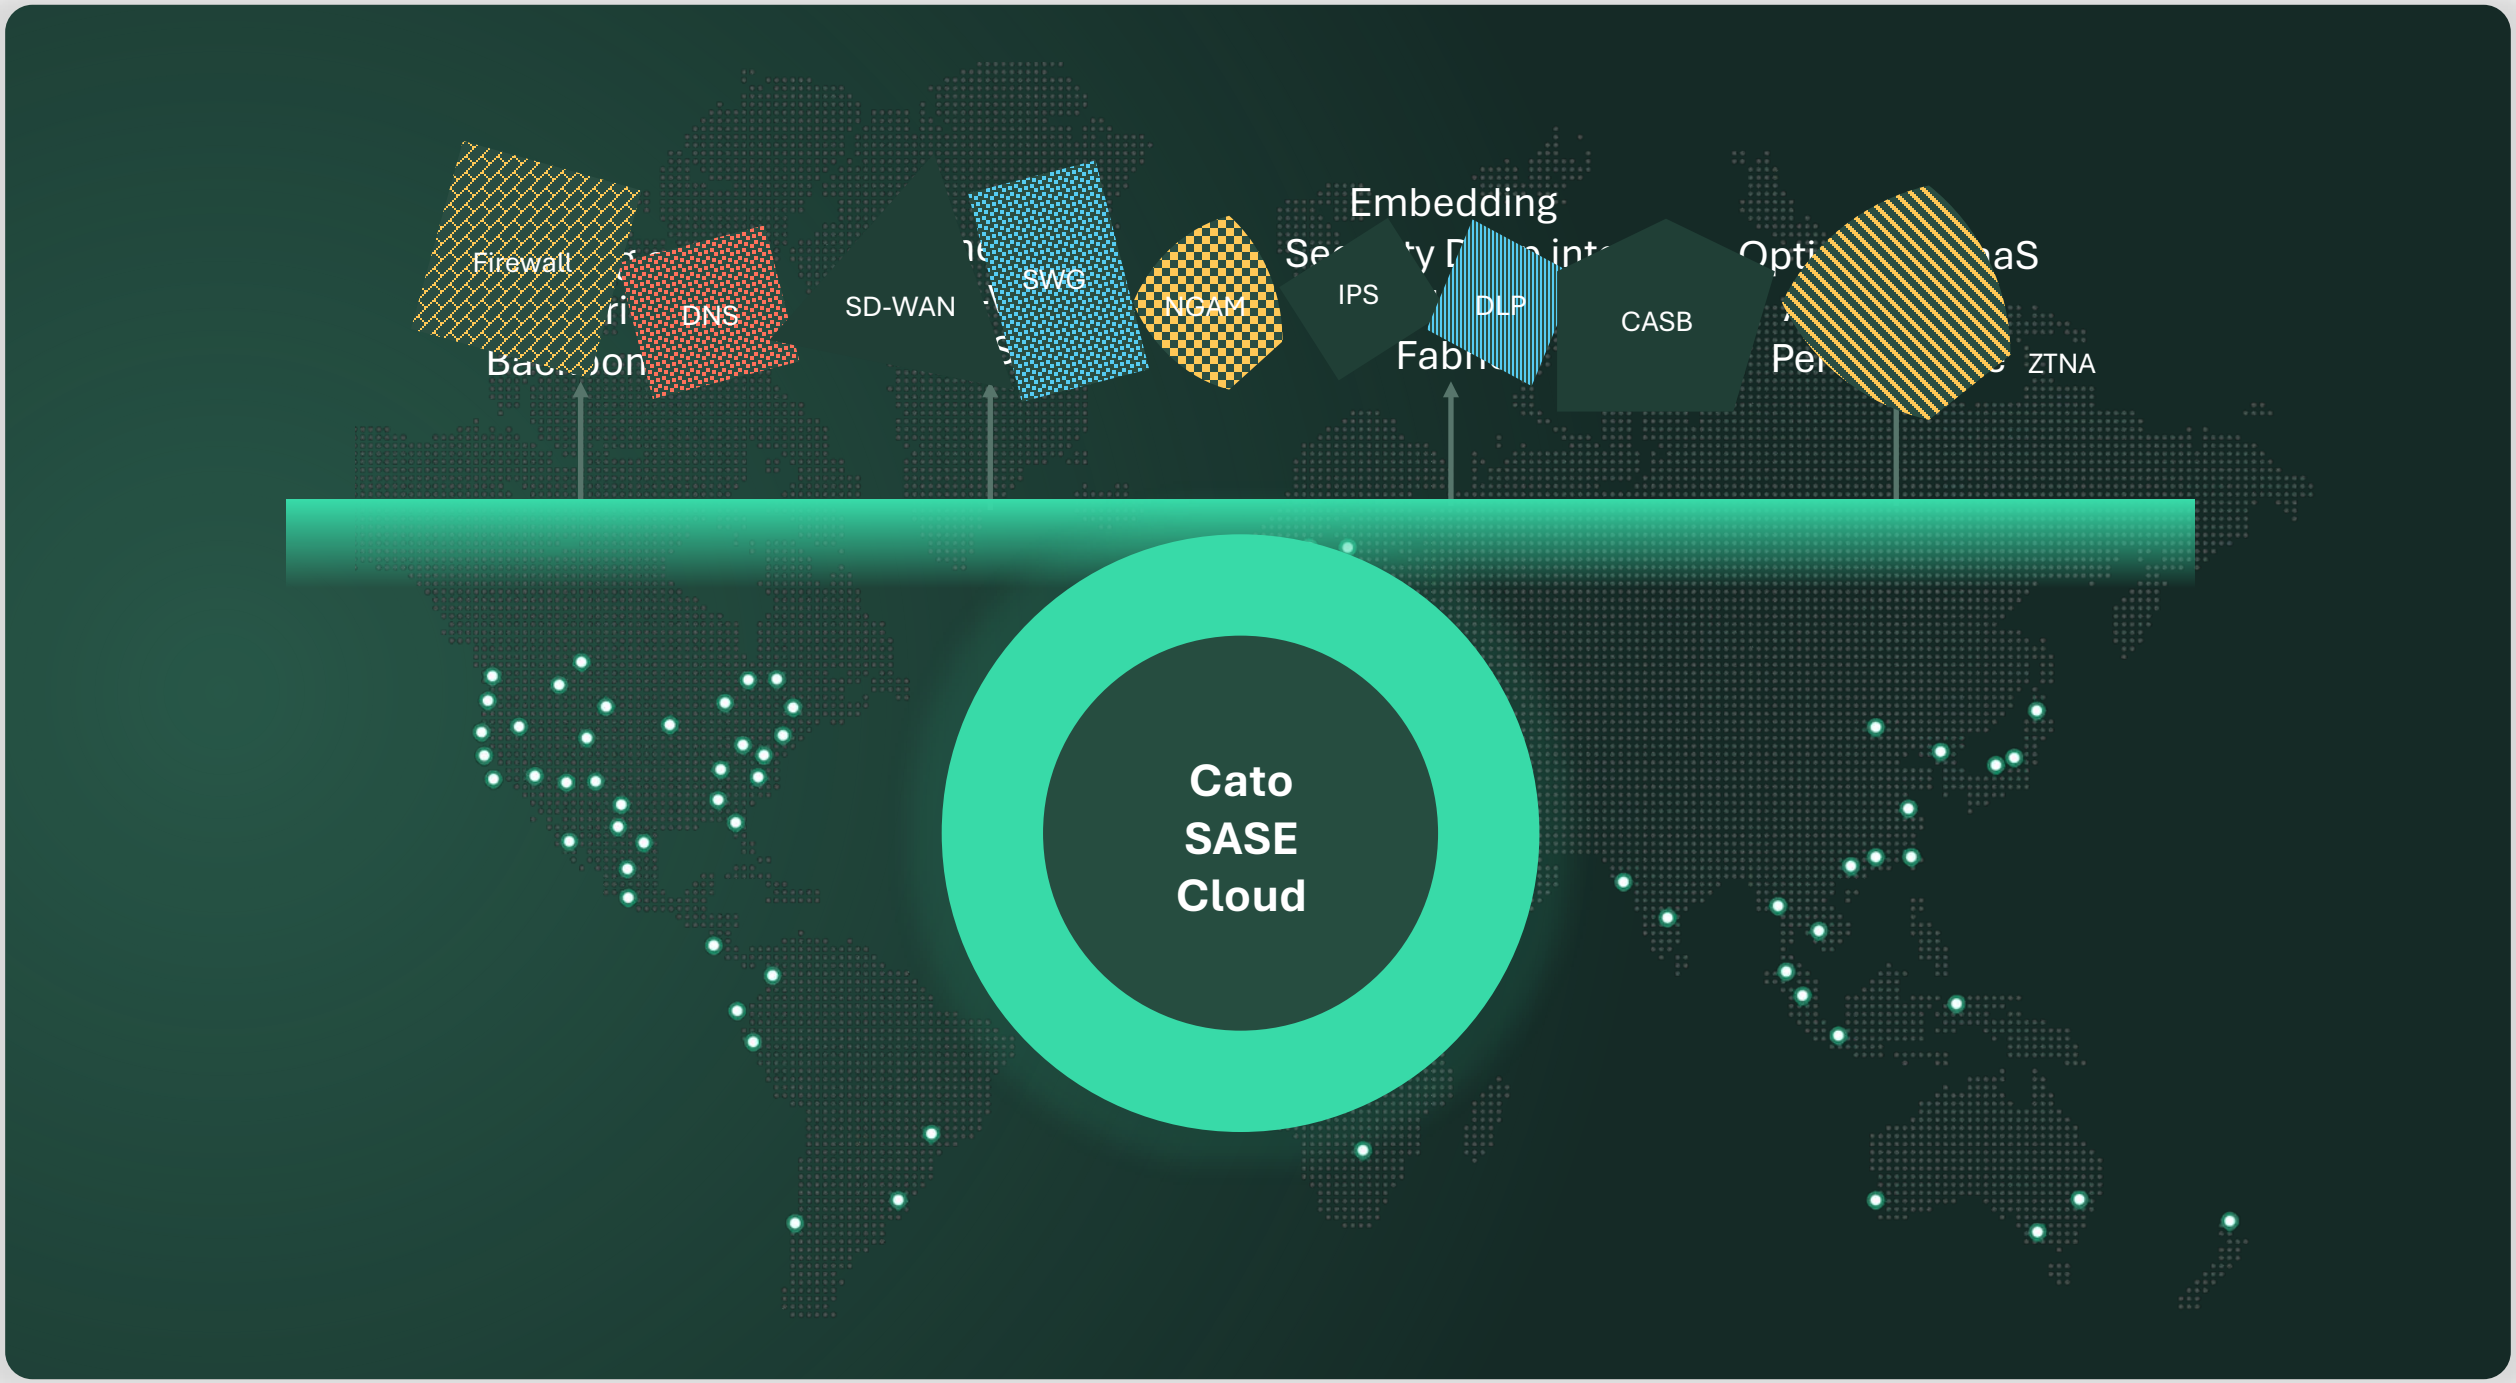

AGENTS

AI that takes action

Monitor behavior and secure access to tools, APIs and MCP.

The same question returns: who keeps the controls aligned?

A unique capability of Cato

One(!)Cloud Platform, Multiple Use Cases

What you need, when you need it

Secure.

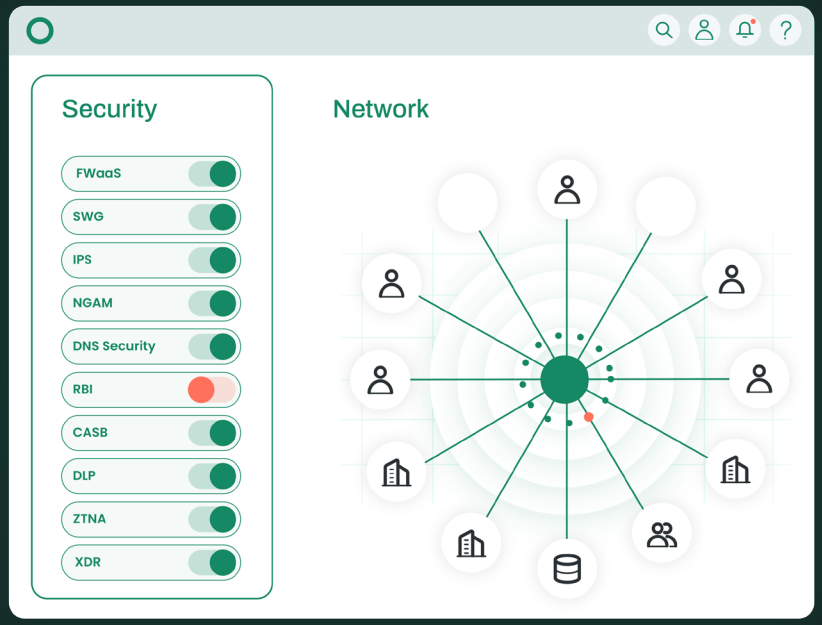

Cloud instant-on for full-stack security as needed

- FWaaS
- SWG
- IPS
- NGAM
- DNS Security
- RBI
- CASB
- DLP
- ZTNA
- XDR

Run.

Simplicity with single dashboard

Connect.

Users everywhere to applications anywhere

One platform.
Less work behind the scenes.

Networking and security working together.
Your team focused on the business.

Who owns the integration in your platform?

Behind the TV, the work remained

Who still owns the integration?
